What is an MSW?

The MSW program provides advanced preparation for a career serving those in need. We train social workers who will provide life-enhancing services, just as we develop leaders who will influence policy to create a more just and humane world. Whatever role they choose, our graduates are prepared to anticipate and address the issues that matter most… in our homes, in our communities and in our world.

MSW programs are designed to prepare graduates for advanced social work practice in clinical settings and social service agencies. Students in MSW programs develop the advanced skills needed to perform clinical assessments, manage large caseloads, understand the importance and requirements of a supervisory role, and draw upon social services to better serve the needs of their clients. They also learn strategies to develop and administer programs and develop social policy.
