HBIO 360 – Nutrition and Disease
(4 Units) Fall 2016

Instructor: Dr. Polidori Francisco (gpolidor@usc.edu)
Lecture – Discussion Mon/Wed 10:00-11:50 WPH 205

This course will be incorporated into the Nutrition and Metabolism Track and is an approved elective for all HBIO Majors.

This course is focused on the pathophysiology and diet therapy of common diseases organized using a systems approach. Case studies are used weekly to solidify the knowledge acquired during lectures and provide students with a practical application of the concepts learned in class. The final project consists of a Community Nutrition Project.

Prerequisite: BISC 220L.
