p. 245. The fourth displayed equation is
\[ \frac{\sum(Y_i - \bar{Y})^2 - \sum(Y_i - \hat{Y}_i)^2}{\sum(Y_i - \bar{Y})^2} = 1 - r^2. \]

It should be
\[ \frac{\sum(Y_i - \bar{Y})^2 - \sum(Y_i - \hat{Y}_i)^2}{\sum(Y_i - \bar{Y})^2} = r^2. \]

The left side of the next displayed equation should be \(1 - r^2\), not \(r^2\).

p. 418, section 9.4.1. Starting with version v15 of the R functions, the two R functions in this section have been updated so that `na.rm=T` means that any row with missing values will be eliminated. With `na.rm=F`, all available are used. (This was done to be consistent with the general use of `na.rm`.)

p. 773 (Table 2). The entries for \(n = 10\) are incorrect. The column headed by .1 are the probabilities for \(p=.2\). The column headed by .2 are the probabilities for \(p = .3\), etc. The table should be as follows:

\[
