The University of Southern California’s Joint Educational Project and its Young Scientists Program (YSP) will be conducting a three hour sustainability workshop for fourth and fifth grade students at Vermont Elementary School. Students will gain the knowledge, skills, and values essential to sustainable living and will learn about recycling, reducing and reusing. This workshop will engage students with hands-on activities that explore sustainability issues, such as energy, consumption, water scarcity, transportation choices, product lifecycles, and carbon footprint as well as investigate potential solutions.

**Come meet the USC Young Scientists Program team, paint with the Mobile Mural lab, and take part in building a recycling center for Vermont.**

**Food/Snacks** will be provided

**Bring an old T-Shirt** for painting the sustainability mural.

Funded through the generous support of the Lisa and Douglas Goldman Foundation.
