The General Course

Study year abroad at the London School of Economics and Political Science

This brochure provides information for students at universities outside the United Kingdom who wish to join the General Course, usually as part of their work toward a degree at their home institution. It complements our website, lse.ac.uk/generalCourse, which provides further detailed information and answers many of the most frequently asked questions.

103 years of study abroad at LSE

The 1909-10 edition of the LSE “Calendar” notes “The [General Course] is recommended to foreigners desirous of studying the development of British Institutions”. Whilst the General Course is still recommended, it is now students studying overseas we welcome, and the study of British Institutions need no longer be your focus!

Today, 103 years later, the General Course offers a fully integrated year of undergraduate study to around 300 students of more than 40 nationalities drawn from over 100 universities.
At LSE more than 250 undergraduate courses are taught each year by faculty organised into the following departments:

- Accounting
- Anthropology
- Economic History
- Economics
- Finance*
- Geography and Environment
- Government
- International Development*
- International History
- International Relations
- Language Centre
- Law
- Management
- Mathematics
- Media and Communications*
- Philosophy, Logic and Scientific Method
- Social Policy
- Sociology
- Statistics

*No UG degrees available. General Course students cannot be placed in these departments.

A list of all the courses available to General Course students in 2011-12 is provided on page 34.
I can still remember getting off the plane at Heathrow Airport in late September. I was definitely a bit jet-lagged and nervous because I had no idea what to expect. I had never been so far away from home for so long. Even further, London was so different – so big, confusing, and overwhelming. I had grown up in Philadelphia and I went to school in DC, but London was in no way comparable to the “grid-system cities” I was used to in the US. Throughout the first weeks, I found myself constantly getting lost, Google mapping every location I needed to go to, constantly searching the Tube map for the correct stop, and feeling incompetent when unassuming tourists asked me for directions.

But this initial shock of London eventually wore off. After nine months, London doesn’t seem scary anymore. By no means am I suggesting that I conquered London, but the city became comfortable. I embraced London in all its crowded, chaotic glory – I no longer felt like a foreigner in London; instead, I felt at home. Moreover, LSE became a home away from home as well. The classes I took were intellectually stimulating and have challenged my previous ideas and conceptions. LSE is an intellectually curious place, where students are encouraged to think for themselves, to critique previous thoughts, and to be innovative. My classmates and co-workers’ ability and passion to discuss various issues constantly amazed me – I have no doubt many people in my classes will go on to change the world.

Besides just learning in the classroom, I also had the opportunity to travel to various places throughout Europe. I saw the Sagrada Familia in Barcelona, the Blue Mosque in Istanbul, Gamla Stan in Stockholm, the headquarters of the ICC in the Hague, and the glaciers of Iceland. I am so appreciative of having had the opportunity to go to these fascinating and incredibly different places with great friends.

While the travelling part was amazing, I think the greatest part of my time abroad was the
amazing people that I met, both General Course students and LSE students alike. I got the chance to meet people from around the world, hearing their perspectives and opinions, and thus understand the world just a little bit better. The people at LSE were so open and willing to listen, eager to hear my stories and happy to share their own. Everyone at LSE is so driven to succeed, to be the best that they can be, and create change in the world.

In sum, my year was eye opening and humbling. If I had to summarize my entire year studying at LSE on the General Course, I would have to use the word incredible. The year allowed me the opportunity to meet people from around the world, to travel and, of course, to study exciting and interesting subjects. The year really shaped me and challenged me, both in and out of the classroom. LSE is a place where you can dive right in, even if you are just studying abroad here for the year. I didn’t feel like an outsider; instead, I really felt that LSE, and London, became places to which I can always return.

Katherine Wzorek, George Washington University, D.C.

General Course Class of 2012
15 reasons to join the General Course

As you read through this brochure you will learn about LSE and all it has to offer study abroad students. You will discover there are many reasons why the General Course is the right choice for you, but here’s a selection to whet your appetite.

1 One of the world’s foremost social science institutions
LSE consistently receives the highest ratings available for the quality of its teaching and research. It is also home to the world’s largest social science library, the British Library of Political and Economic Science.

2 Scholarships worth £15,000
All accepted students are eligible for one of four LSE General Course Scholarships, worth £15,000 each.

3 Over 250 courses to choose from
Covering all the main social science disciplines and taught alongside degree-seeking students in a mixture of lectures and small discussion groups.

4 Support of the Associate Dean for the General Course
Available throughout your time at the School to deal with any problems, queries or issues you might have. You will also have a departmental academic advisor and a student mentor.

5 Teaching delivered by leading academics
LSE's academics are at the cutting edge of the social sciences, influencing opinion and helping shape society. They are frequently called upon to advise governments and international organisations and provide an education grounded in the real world.

6 Elite and intellectual student body
High calibre students selected for their academic ability who share your enthusiasm for the subject matter and motivation to learn.

7 Public lectures delivered by eminent outside speakers
An extensive programme of events attracting leading individuals from all walks of life, including in the last year: Madeleine Albright; William J Bratton; Michael Chertoff; His Holiness the Dalai Lama; Heinz Fischer; Bill Gates; Imran Khan; Mario Monti; Aung San Suu Kyi and Herman Van Rompuy.

8 International and cosmopolitan environment
LSE students are drawn from over 140 different countries and 65 per cent of all those at the School come from outside
the UK. 40 per cent of the academic staff originate from outside the UK.

9 Guaranteed university accommodation
All students offered a place on the General Course are guaranteed university housing.

10 Central London location
The School is on the doorstep of the City of London, Westminster and Covent Garden, providing great social and academic resources.

11 General Course social calendar
A range of UK and European trips and excursions are offered at substantial discounts. General Course students also enjoy a Welcome Party and bespoke orientation events.

12 Residential visit to Cumberland Lodge in Windsor Great Park
An introduction to both the UK and your fellow General Course students in the relaxed surroundings of an English country house.

13 Over 150 student clubs and societies
Covering a wide variety of interests including politics, culture, academia, sports, hobbies and food and drink. Complemented by the activities of the University of London Union.

14 Work in London
Automatic entitlement to work on or off campus both in term time and during vacations.

15 Global reputation for excellence
Graduate schools and employers around the world will recognise and respect the LSE name on your CV. You will also be part of an impressive global alumni network ensuring you maintain a life-long connection with the School.
The London School of Economics and Political Science is a place of genuine intellectual excitement and cutting-edge research, employing many of the world’s leading experts in their fields and attracting the very best students from across the globe. The General Course offers you a unique opportunity to experience all that LSE and the great city of London have to offer, whilst undertaking a year of fully integrated undergraduate study at one of the world’s leading social science institutions.

LSE provides you with an environment in which you can study your chosen courses in depth, whilst becoming fully involved in all aspects of School life. Furthermore, not only will you be an LSE student but upon completion of your year you will become an LSE alumnus, thus beginning what we hope will be a life-long association with the School.

We’re confident that your time at LSE will be both enjoyable and rewarding, providing you with knowledge and experience that will prove hugely beneficial in your future academic, personal and professional careers. If you think you’d enjoy this academically rigorous and culturally rich programme, I encourage you to read on and look forward to receiving your application.

Mark Hoffman
Associate Dean, the General Course
A Message from the Associate Dean
Introduction to LSE

The London School of Economics and Political Science (LSE) offers a unique opportunity to study the social sciences in a university institution with a worldwide academic reputation, while enjoying the cultural, social and recreational facilities of one of the world’s great capital cities.

Why choose LSE?
The School’s location in central London is fundamental to its identity. LSE just wouldn’t be the same if it were located anywhere else. LSE looks out over the London skyline, rather than over green fields. It is stimulating, cosmopolitan and very much a part of the “real world”. The School is compact and full to the brim with students and staff – this just contributes to the vitality and friendliness of the place. LSE offers you the opportunity – and the challenge – to study different ways of understanding human society alongside a global population of students with radically differing experiences, views and beliefs. LSE fosters an atmosphere that encourages you to question ideas and to seek solutions to problems. If you prefer the tranquillity of a rural campus or the traditions of dreaming spires, then LSE will not suit you; but, if you welcome the stimulus of new experiences and ideas in a lively capital city, choose LSE!

What we study
LSE seeks to promote the impartial pursuit of knowledge and understanding about how people organise themselves into, and interact within, social groupings. The social sciences offer a number of ways of investigating and thinking about these questions: they do not teach you a “right” (or left, or centre!) way to solve the world’s problems. The focus of our teaching is on helping you to learn some of the different ways to test your – and other people’s – ideas: and, in the words of our motto, rerum cognoscere causas, “to understand the causes of things”. The School offers courses not only in economics and political science, but also in a wide range of social science subjects, taught within 17 departments and a number of groups and interdisciplinary institutes. It is the only British university specialising in the study of the social sciences, and has a worldwide reputation in the field. Indeed,

DID YOU KNOW...
The decision to create LSE was made by four leading members of the Fabian Society at a breakfast party in Surrey in August 1894. They were Beatrice and Sidney Webb, Graham Wallas and George Bernard Shaw.
several subjects, including Anthropology, International Relations and Social Policy, have been pioneered at LSE.

LSE’s own undergraduates are studying for a very specialised degree over a period of three years. The regulations for these degrees are often tightly drawn in terms of compulsory courses and limited choices within a carefully defined range of optional courses.

General Course students, on the other hand, may take virtually any four year-long undergraduate courses (or the equivalent in half-units) and in any combination. Over 250 courses, listed on page 34 and detailed on our website at lse.ac.uk/generalCourse, are available to General Course students. It is also worth noting that only a third of these courses are in economic or economics-related subjects. Well over two thirds of the teaching available at LSE is in non-quantitative subjects such as anthropology, government, international history, international relations, law and social policy.

General Course students are expected to pursue at least one course in the department to which they are assigned (two if in Economics). Some General Course students choose to spread their four courses over a range of different academic interests. Others choose to concentrate more heavily in just one. The choice is entirely yours! Whichever approach you adopt, you will be taught alongside LSE undergraduates in our regular scheduled lectures and classes – you are not segregated, marginalised or educated differently in any way.

“Academically, culturally, and socially, LSE offers the best study abroad experience out there.”
Matthew Frisch
University of Pennsylvania
Life at LSE

London is an exciting, vibrant and colourful city. Whatever your interests or appetite you will always find something to suit your palate and your pocket in this truly international centre. Whether you are into art, architecture or artefacts, dance, film, music or theatre, London really does have it all!

As a student at LSE you will be studying in the heart of a multicultural city alongside students from across the world. Major attractions such as Theatreland, the West End, the Royal Opera House and the British Library and Museum are right on your doorstep. It is truly one of the most dynamic and exciting cities in the world.

Educational benefits include libraries, professional institutes and all the resources of the University of London. LSE’s central position means that you are a short walk from an enormous range of opportunities and attractions, many of them tailored for the tastes and budgets of the tens of thousands of students in the many universities and colleges in London.

Living in London
The map inside the back cover of this brochure shows some of the attractions that you will be able to access within easy walking distance of LSE. As a General Course student living in the heart of London and a member of LSE’s Students’ Union, you will also be in a position to take advantage of numerous student discounts designed to save you money.

The School itself offers a very wide range of activities to its students. LSE’s weekly Student News e-newsletter lists many public lectures, films and concerts. The Students’ Union has its own newspaper, The Beaver, and supports a lively variety of affiliated social, political and ethnic clubs and societies; there are many social events and entertainments throughout the year, at little or no cost.

For details of the General Course’s own social calendar please see page 16.

Guaranteed Housing
All students who have accepted the offer of a place on the General Course and applied for housing by the deadline of 31 May 2013 are guaranteed to be offered a place in LSE or University of London accommodation, although it may not be in your preferred residence or in a single room.

LSE offers a variety of styles of accommodation. In all of them, there will be a varied mix of home and overseas students, men and women. In each residence there is a student committee to organise regular events, such as video evenings or film shows.

• Bankside House: 587 places in mainly single rooms, many with private
bathroom facilities, located just south of the Thames, next door to the Tate Modern gallery.

- Carr-Saunders Hall: 132 single rooms and 12 twin rooms in the West End, near the Telecom Tower and Tottenham Court Road; meals are provided as required and cost on average £4.50 for an evening meal.

- High Holborn: 448 spaces just a short walk from the School, in the heart of London’s Theatreland. This is self-catering accommodation.

- Passfield Hall: 100 single, 42 twin and 14 treble rooms in a Georgian terrace overlooking a tree lined square in Bloomsbury, near the University of London central precinct; one meal a day (dinner) is included in the fees.

- Rosebery Avenue Hall: 289 single (some equipped with mobility aids for wheelchair users) and 13 twin rooms close to Sadler’s Wells Theatre; evening meals are provided as required, and cost around £4.50.

The University of London also provides intercollegiate accommodation in seven mixed halls: Commonwealth Hall, Hughes-Parry Hall, International Hall, Nutford House, College Hall, Canterbury Hall and Connaught Hall.

Should you miss the application deadline for guaranteed accommodation, or you simply wish to live in private housing, the School can still assist you. There is plenty of rented housing available in London, but to get a good price and a good location you will need to allocate some time to “shopping around”. LSE is able to offer you a place in one of its halls of residence for two weeks prior to the start of the Michaelmas (first) Term. From this base you will be able to meet other General Course students and begin to look for housing together, using both the School’s Accommodation Office and that provided by the University of London.

Further details of LSE accommodation can be found at lse.ac.uk/accommodation.
Welcome party
A well established event at the start of each new academic year is the Welcome Party for arriving study abroad students, hosted by the Associate Dean for the General Course. Held in the week prior to the start of the Michaelmas Term, this popular icebreaker is a great way to meet your fellow students before you settle down to the serious work of studying and exploring London!

Cumberland Lodge residential visit
An escape from London to Cumberland Lodge (a country house in Windsor Great Park) is an annual event in the General Course calendar.

The General Course visit acts as an introduction to both the School and the UK and involves a mixture of academic seminars and social activities, as well as the opportunity to explore the Park and Windsor itself. Held over a weekend in the Michaelmas Term it is open to around 50 students each year, with the cost subsidised by the School.

Tembo
Tembo is the General Course newsletter. Issued weekly during term time, it provides General Course students with bespoke, academic advice, cultural information and money saving tips.

General Course Social Calendar
Throughout your year at the School you will be able to explore the UK and Europe on a range of day trips and short breaks. Past excursions have covered the delights of Amsterdam, the ruggedness of the Scottish Highlands, and the joys of an English brewery! Each trip is subsidised by LSE and offered to our study abroad students at a significant discount, helping you get the most out of your time with us.

LSE Students’ Union and student societies
The Students’ Union represents LSE students on campus. It is there to ensure that your time at LSE is as full, trouble-free and entertaining as possible. To make certain that this is the case for you, General Course students elect their own representative to the Union at the start of each academic year. The Union organises entertainments – concerts, films, cabaret and discos – and funds over 150 student societies covering a wide variety of interests.

Athletics Union
Athletics are the responsibility of the Athletics Union (AU), which is funded by the Students’ Union. All students are eligible
to join the AU by becoming members of any of its constituent clubs. Over 40 clubs exist for a wide range of sports and many use the School’s 25 acre sports ground at New Malden, Surrey. There are pitches for soccer, rugby, hockey (both men’s and women’s) and cricket, together with grass tennis courts, and a restaurant and well-appointed bar, both of which are open on match days. At Houghton Street there is a gym, as well as facilities for martial arts, table tennis and squash.

University of London Union (ULU)
All registered students of the School are automatically members of ULU, and are entitled to make use of their extensive facilities without payment of any extra membership fee. ULU is housed nearby in Malet Street, and the premises include a fitness centre, swimming pool, aerobics/dance classes, discos and live gigs, bars, banks, general store, sports shop, copy shop, ticket agency, travel office, day nursery, opticians, insurance centre, health spa, badminton court, squash court and a range of other recreation facilities. All General Course students are welcome to make use of these facilities.

“Great experience! It represents an enrichment on every level and the teaching is excellent.”
Arnaud Alves de Souza
HEC Lausanne
Life at LSE (continued)

National Health Service (NHS)
A medical centre is located on the LSE campus, providing free, comprehensive, National Health Service (NHS) care to registered patients and to anyone who becomes ill or needs medical attention while at LSE. General Course students are eligible to use the NHS on the same terms as UK residents.

Information about the NHS and how to register/make use of its services is available at lse.ac.uk/medicalCentre

Students who have a disability, long-term medical conditions or dyslexia
The Disability and Well-being Office provides a first point of contact for prospective and current students with disabilities, long term medical conditions and/or dyslexia.

Facilities at LSE include:
• A Neurodiversity Interest Group
• Resources via moodle and the brainhe.com website
• Library assistance
• Assistive software and specialist IT support
• A range of accessible and adapted rooms in halls of residence
• All lecture theatres and some classrooms are fitted with infra-red hearing support systems

“This year in London changed my life. Prior to studying at LSE, I had a much more limited knowledge of critical global issues.”

Akhila Kolisetty, Northwestern University
DID YOU KNOW...
International relations, social policy, sociology, social anthropology, social psychology and criminology all have their origins as subjects of university study in the innovative work carried out by LSE academics.

Reader, note-takers and support assistants. LSE Circles Network of peer/staff support
• Practical support provided by a Community Service Volunteer (CSV)
• A room, with bed and easy chairs.
You can contact the Disability and Well-Being Office at Disability-Dyslexia@lse.ac.uk

LSE Student Counselling Service
This is a free and confidential service for all LSE students, which aims to help you cope more effectively with any personal or study related difficulties. The Student Counselling Service web page has further information and links to self-help websites for students. More information can be found at lse.ac.uk/studentCounselling

Student Mentoring Scheme
General Course students, in common with our new undergraduate degree-seeking students, can use the Student Mentoring Scheme.
Volunteer mentors come mainly from the second and third years of undergraduate degrees. They provide incoming General Course students with a friendly face and information on the wide range of support services available at the School. Whilst they are not expected to advise you on academic or personal matters, they will be able to refer you to the individuals and departments at LSE that are best able to assist you. Your student mentor will contact you via your LSE email account prior to the start of the academic year, and will offer to meet you in person during the induction period. Further information on the scheme can be found on the General Course website.
Careers
The LSE Careers Service has an experienced team of careers advisers and information staff to provide assistance and advice to General Course students, both informally and in careers seminars and interviews.

Whether you are looking for internships, work experience, vacation work or part-time, term-time jobs to help finance your study, you can search for current job vacancies at “My Careers Service”.

After you’ve left the School “LSE Graduate Advance” offers a range of career planning and job search support.

For further information please see the Careers Service website at lse.ac.uk/careersService

Volunteering
The LSE Volunteer Centre exists to help place LSE students in voluntary positions all over London. Volunteering is about giving something back to the community and helping others, whilst helping yourself too. You can develop your skills; meet new people; have fun, and make a difference to the local community. A wide range of organisations and projects are looking for your help, so whether your interest lies in caring for animals, staffing helplines, working in museums and galleries or assisting organisations dealing with women’s issues (to name but a few) you will find something to interest you.

For further information visit the Volunteer Centre website at lse.ac.uk/volunteerCentre
LSE believes in a tried and tested approach to teaching, ensuring students have a solid understanding of the core elements of their subjects.

**Teaching methods**

In each of the four courses you take over the year, teaching will consist of a mixture of lectures and linked classes (discussion groups), running in parallel, in which you will work through questions, problem sets and issues raised in the lectures or present and discuss your own papers or essays. Lectures are attended by all the students taking the course (and some auditing the lectures out of general interest); on a popular course, there could be several hundred students in a lecture. For the classes, you would be allocated to a much smaller group, generally consisting of no more than 15 students. In some advanced third year courses, the two functions of lectures and classes may be combined in seminars or small-group tutorials: this depends on the numbers taking the course, and on the subject being studied. The number of “formal” contact hours will vary with the type of course you are taking but will normally be between 2-4 hours per course per week.

Lectures are not compulsory but are strongly recommended. Classes, however, are compulsory and you will usually be expected to submit two written pieces of work or a certain number of problem sets per course per term. Class teachers report each term on your attendance, work in class and written work submitted for the class. These reports are then sent to your academic adviser who will discuss them with you, as well as your overall progress. Your class teacher will also provide an overall grade at the end of the
Education (continued)

Examination and assessment
Like our teaching methods, LSE has a traditional approach to examinations and assessment. For most courses, students are examined once, at the end of the year. This is usually by three-hour unseen paper, and all General Course students are required to take these exams. These results appear on the final transcript. A number of courses have an “assessed coursework” component that contributes towards the final exam mark. Typically this takes the form of an independently produced piece of writing.

In exceptional circumstances, and only with the permission of the Associate Dean for the General Course and the course teacher responsible, a General Course student may also pursue one graduate-level course as one of their four choices. However, such students are not permitted to sit a graduate examination at the end of the year and will need to arrange an additional form of assessment – usually a piece of independent research and writing.

“The program has been simply exceptional in every dimension. It has broadened my horizons academically, socially and culturally.”

Divya Goenka
Brandeis University

The program has been simply exceptional in every dimension. It has broadened my horizons academically, socially and culturally.”

Divya Goenka
Brandeis University
Credits, grades and the transcript
All General Course students are reminded that it is their home institution that
determines if and how credit is awarded, not LSE. As already described, General
Course students receive two sets of grades on their end of year General Course
transcript; one, the class grades, for their course work undertaken throughout the
academic year for class teachers, and the other the exam grade, for each of the four
examinations taken at the end of the year. On successful completion of the General
Course each student will be provided with a detailed transcript which includes the
following information:

(a) the titles of the courses for which the student was enrolled;
(b) assessments in letter grades for class work for these courses;
(c) assessments in letter grades for final examinations taken;
(d) an indication of the exam grade distribution for all General Course students in current and previous years, with equivalents for other full-time undergraduates at the School.

Note: Students studying on the General Course through the Institute for Study Abroad, Butler University, or The College of Global Studies at Arcadia University will receive from them a transcript converted into American semester credits and letter grades.
The Library
The Library (The British Library of Political and Economic Science) is more than a book and journal collection. It also has hundreds of study spaces and IT workstations, laptop points, rooms for group study, video viewing and photocopying facilities. The Library’s Course Collection contains books on your reading lists and the Electronic Library, accessible from workstations right around the School, provides access to an increasing range of publications such as newspapers and journals.

The School also has a separate collection of general literature and music which is housed in the Shaw Library, a pleasant room in which to read, study, relax and listen to lunchtime and evening recitals. As an LSE student you will also have access to the libraries of most other colleges of the University of London.

To find out more about the Library, visit their website at lse.ac.uk/library

Information technology
IT facilities on campus
There are around 1,000 PCs available for students to use in open access areas around the School and in the computer classrooms. Over 450 of these PCs are located in the Library, and there is 24-hour PC availability on campus during term-time.

All networked PCs on campus provide access to common desktop applications and specialist software. PCs on campus also provide access to the Library catalogue and a wide range of electronic databases and datasets (eg, census, financial information).

IT facilities in residences
All residences are wired for direct connection to the School network. There are a small number of open access PCs in each residence computer room, which are available 24 hours a day, and students may use their own computer in their study bedroom or in the wireless zone, located in the social and recreational areas in residences.
Using your own computer
Computer ownership is not obligatory, but if you do bring your own computer, IT Services provides information and help with connecting to the LSE IT environment and accessing services and resources both on campus and off site. On campus, there are over 300 laptop plug-in points in the Library, and laser printing is also available. In addition there is an extensive wireless network from which you can gain access to the internet and email. Off campus, we recommend you use the Remote Desktop.

LSE Mobile is a phone app for students which lets you access LSE information such as campus maps, PC availability, news and events, your course timetable, your Library account and more from your mobile device.

For more information see lse.ac.uk/itservices

LSE Language Centre
The LSE Language Centre is unique – no other centre specialises in creating courses targeted to the needs of students and practitioners in the field of the social sciences and related areas of study. All the Centre’s teachers are native speakers who combine extensive teaching experience with an educational background in one or more of the subject specialisms offered at LSE. Whether you are going to study a modern foreign language or need to improve your English for academic purposes, their aim is to provide you with the highest level of language support throughout your studies.

Further information can be obtained from the Language Centre website at lse.ac.uk/depts/language

Academic guidance
As already alluded to, LSE believes that its students are mature, responsible adults who are self-motivated, self-disciplined and capable of guided independent study. As an LSE student you would be largely responsible for organising your own work to keep up with the requirements of your courses. Anyone who meets our admission standards should have a good idea already of the kind of skills needed,
but we find that our students can often use some extra advice. LSE can help in the following ways:

**Study skills support**
The LSE Teaching and Learning Centre offers a wide range of development opportunities to complement and strengthen your academic learning.

- Study advice and personal development programme: A series of open lectures and workshops, beginning with an “Introduction to study at LSE” and continuing with topics including essay writing, effective reading, exam preparation and stress management.
- LSE GROUPS: Part of the School’s Maximise Your Potential initiative.
- Learning World: Providing online resources for a range of study-related skills, advice from LSE staff and links to other student-centred departments.
- A limited number of one-to-one appointments with study advisers (in both quantitative and qualitative subjects) or the Royal Literary Fund Fellow (for writing advice).

Further details are available at lse.ac.uk/TLC
**Teachers and academic advisers**
For guidance about a particular class, there is the individual class teacher, and a teacher responsible for each course (who guides the class teachers). Each student has an academic adviser, who meets with you several times over the course of the year, receives regular reports from class teachers, and is able to advise on your progress. The academic adviser is also there to help with any academic, administrative or personal questions where you may not be sure who is the person or office responsible. Each department also has a Departmental Tutor responsible for the day-to-day running of undergraduate studies in the department and all members of academic staff set aside specified times when they are free to see any student.

**Associate Dean for the General Course**
In addition to your class teachers and an academic adviser, the Associate Dean for the General Course is available to deal with any academic, administrative or pastoral support issues you might have. These can include advice on housing, particular course choices, changing departmental affiliation and support for credit transfers to your home university. You are encouraged to contact the Associate Dean whenever you need assistance.

"You don’t just read the most cutting edge and influential books at LSE, you learn about them from the authors whose opinions shape the way contemporary global leaders think”

Chris Bostock
Trinity College, Hartford, CT
Application for admission to the General Course may be made by students who will have completed at least two years of study in an overseas university by the time they register at the School. Students who have directly entered the second year of their university on the basis of A-levels or an International Baccalaureate will be considered on a case-by-case basis. Students who have directly entered their second year on the basis of “Advanced Placement” tests will not normally be considered for a place. We positively welcome good applicants from any university in any country. Students must register for the full academic year, ie, from October to June. LSE has no “semester” or “single-term” programmes.

Students undertaking a University of London International Programmes degree with LSE as the lead college may be eligible for entry after just one year of study. Those interested in pursuing this opportunity should contact the School at gc@lse.ac.uk before submitting an application.

Students must follow and abide by the specific requirements of their home university. Failure to do so may adversely affect the outcome of the selection process.

Applications should comprise:

- a completed General Course application form (available at lse.ac.uk/generalCourse);
- a college transcript showing grades up to and including the first semester of the applicant’s second year of university*. Transcripts must be written in, or translated into, English;
• two academic references, at least one of which must be written by a university teacher currently familiar with the applicant’s work, preferably in a field which he/she intends to pursue at LSE. References must be written in, or translated into, English.

* Students come to us from many different universities, using varied grading systems; any transcript/record should be accompanied by a note on how to “translate” the grades.

Once the completed application is received by the Student Recruitment Office, it normally takes less than seven working days for a decision to be issued. Both the applicant and their home university will be notified whether or not a place on the programme has been offered. The applicant is under no obligation to accept an offer of admission nor do they make any legal or financial undertaking before they arrive at the School.

**Online application**

The General Course has its own online application, which applicants are welcome to use in place of the traditional paper form. The online application is completely free of charge and facilitates the electronic submission of all the required documentation, including transcripts and references. Applicants studying at institutions that require continued use of the paper form are, however, assured that submitting paper applications remains perfectly acceptable. A pdf of the application form can be downloaded from lse.ac.uk/generalCourse

**Application and induction dates**

Completed applications can be submitted at any time and will be considered from January 2013. The application cycle closes on 6 September 2013. We operate a “rolling admissions” process until all the available places are filled so applicants are recommended to apply early. Students joining the General Course are advised to arrive in London a week prior to the start of the new academic year if they are staying in university accommodation, and earlier if they need to find housing in the private sector (see section on “Guaranteed Housing” page 14). Along with the induction activities organised for all new undergraduate students by the School and your department, there will also be an induction specifically tailored for General Course students, details of which will be included in your Offer Pack.
Entry requirements
We judge each applicant individually and have no “agreements” that give advantage to students from particular countries or particular universities. We seek to allocate students to an academic department reflecting their major interests, but permit applicants to choose courses across the full range of our curriculum. We look in detail at each applicant’s recent university academic record, paying particular attention to the subjects studied and the grades obtained. For example, using university grade scales common in the USA, a student with a minimum 3.3 grade point average (on a 4 point scale) will be positively considered. In the case of those students applying to departments or predominantly listing courses that are quantitatively based (ie, economics, maths and statistics) we are looking for a 3.5 or better in related courses, including higher level calculus and linear algebra. In practice, we are looking for students who are in the top 10-15 per cent of their class. We are primarily interested in a student’s academic work in social science subjects and will be especially interested in the quality of their work in the fields they might wish to pursue at LSE. We are particularly assisted by the comments of academic referees, especially if they are relevant to the courses the applicant wishes to follow at the School.

Applicants whose two years of university education prior to joining LSE haven’t been undertaken in English are required to provide evidence of proficiency in the English language. The following is an example of some of the qualifications we accept:

- International English Language Testing Service (IELTS) with a score of 7.0 in all four components
DID YOU KNOW...  
London is the largest city in Europe with a population over 7.5m. It has 300 museums, 250 art galleries, 200 theatres and 5 Premier League football clubs.

• International General Certificate of Secondary Education (IGCSE) English as a First Language with a grade B or better including the Speaking and Listening coursework component (Edexcel) or grade 2 in the optional speaking test (CIE)

• Test of English as a Foreign Language (TOEFL) with a minimum score of 627 in the paper test, including 5.5 in writing, or 107 in the internet based test with a minimum of 25 out of 30 in each of the four skills.
Applications can be submitted directly to the School or via the IfSA, Butler University, or The College of Global Studies at Arcadia University (please see below). Those applying directly to LSE will incur no application fees and no tuition deposits. Most applicants will find that they are helped by initial contact with their home university’s Office of International Programs or Study Abroad Office, to whom we regularly mail General Course material. Such offices can advise you on their support for study abroad and its impact on your academic progress, financial aid, etc.

Students who are offered admission to the General Course are notified by email and invited to complete an “Acceptance Form” online. This will be followed by an Offer Pack detailing information on our registration and orientation arrangements.

We actively encourage enquiries, most conveniently by email, and invite you to contact the School to discuss any prospective application – write to: gc@lse.ac.uk

**The College of Global Studies at Arcadia University**

Students wishing to apply to the General Course through The College of Global Studies at Arcadia University (CGS-Arcadia) should visit the CGS-Arcadia website at www.arcadia.edu/abroad for further information and details of the fees applicable.

**The Institute for Study Abroad, Butler University**

Students wishing to apply to the General Course through the Institute for Study Abroad, Butler University (IfSA-Butler), should visit the IfSA-Butler website at www.ifsa-butler.org for further information and details of the fees applicable.

**Fees**

The tuition fee for all students applying directly to the General Course (not through CGS-Arcadia or IfSA-Butler) in 2013-14 will be £16,227 for the full year. Please note, the tuition fee is the same for all General Course students, regardless of nationality or residence. Fees cover tuition, examination entry, Library use, access to all LSE social, health and welfare facilities and Students’ Union membership. They do not cover accommodation or living costs which must

---

**DID YOU KNOW...**

In 2008 Her Majesty The Queen opened the New Academic Building at the School. The £71 million building houses the School’s Departments of Management and Law.
be budgeted separately. We estimate that the cost of living in London during the nine months of the 2012-13 academic session will total some £9,000, with total one-off costs of about £1,000, giving a sum total of about £10,000 for nine months. However, savings can be made. For instance, walking to LSE can eradicate local travel costs and students who cater for themselves or eat at LSE will live more cheaply in terms of “household expenses”.

LSE is also a registered institution for most types of US and Canadian Student Loans. The LSE US Student Loans reference number is G06693.

**John C Phelan General Course Scholarships**

In the academic year 2013-14, LSE will offer four John C Phelan General Course Scholarships. Each award will be worth £15,000 and all students accepted on the programme will be eligible to apply.

Applications will be considered primarily on the basis of need.

Further information is available at lse.ac.uk/GCScholarships

“...cosmopolitan city, rich with history and culture, and challenging and thought provoking academics makes LSE the perfect place to combine real life examples and experience with your course of study.”

Swati Balakrishnan
Whittier College
Departmental Information and Course Listings

Successful applicants are, whenever possible, assigned to a place in one of the academic departments at LSE reflecting their major area of interest, and that department will subsequently nominate a member of their faculty to act as the student’s academic adviser during the year. Before making such an assignment we will weigh up your academic background, the balance of your proposed course interests and the demand for places in particular departments from one year to another. The key issue is that you have the right to choose the courses you wish to follow – the departmental assignment does not restrict your right to pursue courses in other fields of study. Please note, once accepted, you have every right to change your course choices, but it is not possible to change your departmental allocation without the permission of the Associate Dean for the General Course.

The LSE application form asks you to identify up to six courses of particular interest – to assist us in making an initial departmental assignment. Prior to your arrival you will be asked to select four courses for the purposes of pre-registration. However, your final selection of four courses will be confirmed after your arrival at LSE and in consultation with your academic adviser. Our aim is to give you full access to those courses that you wish to pursue. Thus, whilst LSE cannot commit itself to guarantee the availability of course selections, every effort is made to do so. Again, there are more than 250 courses available to General Course students and you have the right to change your course selections up to the end of the fourth week of the first term. In more than 99 per cent of cases, students get all of the courses that they want – and time to explore and to change their minds.

Whilst we are unable to guarantee the availability of any course, the Course List that follows represents what was taught in 2011-12. A full Course Guide (naming the key academic responsible for each course, a description of its coverage, basic bibliographies and any pre-requisites) is available on our website at lse.ac.uk/generalCourse and should be referred to when you complete the Course Preferences section of the application form. The three-digit codes indicate whether the course is normally followed by our own three-year degree students in their first, second or third year of study, but access is not restricted for General Course students.
100 level courses are taught to LSE’s first year degree seeking students. They are introductory level courses that have no specific prerequisites in their own subject but may require some mathematics or other related subjects. General Course students normally select these courses when they have no previous background in the subject, ie, they want to gain experience of a new academic field.

200 level courses are taught to LSE’s second year degree seeking students. They are intermediate level courses that have prerequisites in the form of university level introductory courses in the same, or a closely related, subject. These courses are the equivalent of Junior year courses at four year degree institutions and, as such, are usually the most appropriate for General Course students.

300 level courses are taught to LSE’s third year degree seeking students. They are advanced and equivalent to either final year undergraduate or first year graduate courses. They have prerequisites of university level intermediate courses. General Course students should ordinarily only select one of these courses when they have a minimum of three semesters background and very high grades in the relevant field.

The online course descriptions should be read carefully as many courses assume a level of aptitude in the subject, and some are only available to General Course students with the permission of the teacher responsible. We also encourage new students to sample a range of courses in the first four weeks of the session and to discuss their own level of skill and the course expectations with lecturers and class teachers before confirming their course choices for the year.

The majority of General Course students find they are sufficiently stimulated by one (or at the very most two) 300 level courses when combined with those offered at the 200 and 100 levels. The optimum combination for a serious student is usually one 300 level and three 200 level courses. Unless you have declared your major sometime ago and have a very strong background in the subject, it is unwise to take more than one 300 level course.

In the listing that follows, (H) designates a half-unit course and, therefore, one that counts for only half the “weight” of a full-year course: typically, all of its teaching is contained in just one term and students would take two half-units instead of one full year course. All courses, including half-unit courses, are examined at the end of the Summer Term.
Accounting (AC)
Accounting and finance are concerned with more than just computational skills. Both subjects are central to the way in which management, shareholders and society at large perceive, understand and seek to change and control the nature of organisations, as well as to an understanding of how the market allocates finances to firms. LSE is known for pioneering new approaches to the study of the modern practice of financial management in organisations.

Anthropology (AN)
Social anthropology studies human societies and cultures in a broad comparative perspective. Social anthropologists try to explain the causes of variation in social and cultural behaviour, and also to understand what it means to belong to a cultural group whose values and rules may be very different from those familiar to you. At LSE we are distinctive in our strengths in the fields of law, human rights, cognition, religious practice, kinship, gender, nationalism and everyday forms of the state. Our concern with the global south (or “third world”) leads to a serious engagement with issues of development, globalisation, industrialisation and the effects of neo-liberalism.

Economic History (EH)
Economic and social history is concerned with understanding the process of change in the past. It uses the skills of the economist, the statistician and the sociologist, as well as those of the historian.

EH101 Internationalisation of Economic Growth
EH205 Towns, Society and Economy in England and Europe, 1450-1750
EH206 The Evolution of Economic Policy in Advanced Economics
EH207 The Making of an Economic Superpower: China since 1850
EH220 Comparative Economic Development: Late Industrialisation in Russia, India and Japan
EH225 Latin America and the International Economy
EH240 Business and Economic Performance since 1945: Britain in International Context

Economics (EC)
Economics today tackles a broad range of problems, from barriers to economic development to international financial crises. An open-minded and scientific approach to these issues requires formal modelling of economic relationships, and testing hypotheses against data. The study of economics therefore involves developing problem-solving skills, including
mathematical and statistical abilities, and applying these skills, without losing sight of the real world.

**Finance (FM)**
Finance students examine the theory and practice of many aspects of the field that are key to understanding how financial institutions and markets operate around the world.

**Geography and Environment (GY)**
One of the critical questions in modern society is how to manage processes of economic and social development so that we can make sustainable improvements in human welfare without destroying the environmental resource base on which all life depends. Our teaching emphasises the fact that the majority of environmental problems arise from human actions and decisions, and that all environmental management schemes seek to achieve objectives defined by humans within constraints imposed by political and economic systems.

GY323 Environmental Assessment and Management

Government (GV)
Politics is about power, conflict and ideas. The study of politics involves analysis of the ways in which individuals and groups define and interpret political issues and seek to shape government decisions. It encompasses a broad spectrum of activities relating to public affairs, from elections and bureaucracies to wars and terrorism. Because it is at the junction of power and morality, politics has always attracted the attention of philosophers and historians, and its study, originating in Athens in the fourth century BC, is the seed bed of all the social sciences.

HY319 Napoleon and Europe
International Relations (IR)

International relations is the study of an international system composed of territorial states which acknowledge no superior authority over matters which they consider of vital interest. It deals with the nature of the changing relations between states and with non-state actors. It studies the functioning of the international system – the forces, factors and interests, the customs, rules, institutions and organisations from which the theory and history of its development are formed.

Departmental Information and Course Listings (continued)

Management
The Management Department is made up of four academic units: Employment Relations and Organisational Behaviour (ID); Information Systems (IS); Management Sciences (OR), and Managerial Economics and Strategy (MN).

Employment Relations and Organisational Behaviour.
Traditionally, study of employment relations has focused on trade unions and their activities. More recently, interest in the management and government perspective has grown. Since the 1980s, in particular, the study of managerial strategies and techniques in selecting, motivating, developing and rewarding employees has flourished as part of the growth in business education.

ID200 Organisational Theory and Behaviour
ID290 Human Resource Management
ID300 Selected Topics in Employment Relations and Organisational Behaviour
ID301 Leadership in Organisations: Theory and Practice

Information Systems.
Information technology is absorbing an ever-increasing proportion of the resources of organisations and governments, both in terms of money and human resources. Consequently, there is a need for people who are educated to understand and assess the complex interactions between information technology and people. To do this it is essential to look beyond the technologies themselves and investigate the rich social and organisational contexts in which they are deployed.

IS143 Information Technology and Society
IS340 Information Systems in Business

Management Science.
Managers in industry, business, government and defence are often confronted with difficult decisions and need a rational basis on which to make them. The management sciences are a range of methods used to assist managers through applying scientific and quantitative approaches to the management of organisations, often involving the construction of computable models of the key features in decision-making.

OR202 Operational Research Methods
OR301 Model Building in Operational Research
OR304 Decision Sciences in Theory and Practice
OR307 Simulation Modelling and Analysis (H)
Managerial Economics and Strategy.
To cope with the challenges of the 21st century, managers will require a deeper understanding of the global business environment and the social world as well as a greater capacity for ongoing learning than provided by traditional business education. A feature of management at LSE is its emphasis on the social sciences – in particular, economics, psychology and sociology – as a lens for understanding organisations and management practice. Going beyond fads and catchphrases, students are encouraged to think about theory and evidence.

MN200 Management: Theory and Evidence
MN201 Economics for Management
MN203 Social Science Research Methods for Management

MN302 International Marketing: A Strategic Approach
MN303 International Context of Management (H)
MN304 Strategy (H)
MN307 Aspects of Marketing Management (H)

Mathematics (MA)
The Mathematics Department at LSE is internationally renowned for its teaching and research in mathematics related to the social sciences, particularly the mathematics necessary for understanding economics.

MA100 Mathematical Methods
MA103 Introduction to Abstract Mathematics

MA314 Theory of Algorithms (H)
MA315 Algebra and its Applications (H)
MA316 Graph Theory (H)
MA317 Complex Analysis (H)

Philosophy (PH)
Studying philosophy means engaging with some profound and fascinating questions; questions that any inquisitive and critical thinker will find themselves asking at some point in their life, but which many non-philosophers do not pursue in depth. In studying philosophy at LSE you will debate and investigate the issues and problems that have preoccupied philosophers since Greek times, as well as learning the skills and techniques of reasoning.

PH101 Logic
PH103 Reason, Knowledge and Values: An Introduction to Philosophy
PH201 Philosophy of Science
PH203 Philosophy of the Social Sciences

PH213 Scientific Revolutions: Philosophical and Historical Issues
PH214 Morality and Values
PH217 Set Theory and Further Logic
PH218 Philosophy of the Biological and Cognitive Sciences
PH220 Evidence and Scientific Method
PH221 Problems of Analytic Philosophy
PH299 Essay on an approved subject in Philosophy

Social Policy (SA)
Social policy is a vibrant subject at LSE, taught by many leading experts in the field. People in the Department are broadly interested in what we should do to ensure the wellbeing of ourselves and others.

How far do we have a responsibility as individuals to provide for ourselves? What should governments, employers, voluntary organisations and families do? Who gets what in our society and in other societies, why and what issues does it raise? You can study policies and measures at many different levels: local, national and international, and in many different kinds of organisation.

SA100 Foundations of Social Policy

**SA221** Poverty, Social Exclusion and Social Change

**SA222** Principles of Social Policy

**SA250** Demographic Description and Analysis

**SA309** Crime Control: Ideas and Controversies

**Social Psychology (PS)**
Social psychology is both an exciting area of research within psychology and a perspective on the whole of the discipline. Psychology at LSE looks at human behaviour in the contexts of evolution, health and development, society and culture and in relation to the economy, communications both interpersonal and mediated, politics, and social organisations.

**PS102** Self, Others and Society: Perspectives on Social and Applied Psychology

**PS203** Societal Psychology: Theory and Applications

**Sociology (SO)**
Sociology helps us to understand not only the unparalleled changes that are occurring throughout the world and the changing patterns of relationships between peoples, but also our own lives, predispositions, values and expectations in a way that no other academic subject can rival. LSE aims to be both a guardian of the discipline of sociology, and a leader in the development of the social sciences into new intellectual areas, addressing the social problems and ethical dilemmas that face a globalised post-modern society.

**SO100** Key Concepts in Sociology: An Introduction to Sociological Theory

**SO110** Key Issues in Contemporary Societies: An Introduction to Contemporary Sociology

**SO201** Sociological Analysis

**SO203** Political Sociology

**SO210** Crime, Deviance and Control

**SO211** Sociology of Health and Medicine

**SO221** Issues and Methods of Social Research

**SO224** The Sociology of Race and Ethnicity

**SO307** Human Rights, Social Suffering and Justice

**Statistics (ST)**
The Department offers expert teaching and supervision in time series, stochastic modelling, financial mathematics, actuarial
LSE gave me the intellectual firepower to critique and question academic material.”

Andrea Gallego
Stony Brook University

Statistics, latent variable modelling and sample survey theory and methods.

**ST102** Elementary Statistical Theory

**ST327** Market Research: An Integrated Approach
**ST330** Stochastic and Actuarial Methods in Finance (in conjunction with **ST302**)

**DID YOU KNOW...**
35 past or present world leaders have studied or taught at LSE and 31 current members of the UK House of Commons and 42 members of the House of Lords have also either taught or studied at LSE.
Alumni relations
Whilst you are likely to be returning to your home university at the end of your time on the General Course, the School recognises its ongoing commitment to current and former students, including those on the General Course, through a highly effective alumni relations programme that is administered by School staff and a network of volunteer alumni across the world.

For further information visit our website at: lse.ac.uk/alumni or Tel: +44 (0)20 7955 7361

LSE Summer Schools
LSE runs four “summer” schools; two based in London, one located in Beijing, and one located in Cape Town.

The Summer Schools based in London provide an opportunity for students to share in LSE’s tradition of academic excellence over a short period of time. Summer Schools are offered in July and August each year, delivering three-week intensive courses that are taught and examined to LSE standards and based on regular undergraduate courses. Summer School courses are offered in Accounting and Finance; Economics; English Language; International Relations, Government and Society; Law, and Management.

For further information visit their website lse.ac.uk/summerschool

The LSE-Peking University (PKU) Summer School is run over two weeks in August at PKU’s campus in Beijing. It offers recognised flagship courses from the London Summer School, an outstanding established course at Peking University and three new courses. Together these cover the fields of Accounting and Finance; Management; Economics; International Relations, and Law. All courses are taught in English by internationally renowned specialists in the field.

For further information visit their website at lse.ac.uk/study/summerSchools/LSEPKUProgramme

The LSE-University of Cape Town (UCT) July School is an exciting new two-week academic programme offering a range of university-level courses considering the academic and policy responses to the major social science issues of the 21st century, all with reference to Africa and its relations with the world today. Courses are taught in English by world-leading faculty from LSE and UCT.

For further information visit their website at lse.ac.uk/LSE-UCTJulySchool
Graduate studies at LSE

Although this brochure is written with potential General Course students in mind, a note on graduate opportunities at LSE could be of interest if you are thinking about higher degree work in the longer term. Just over half of our student population is engaged in such work and LSE is one of the major world centres for the advanced study of the social sciences. The School offers tuition for graduate diplomas, for taught Masters degrees (MSc, MA, MPA, LLM) and research programmes (MPhil, PhD).

More information is available at: lse.ac.uk/graduate
A simple guide to the most important facts

• LSE offers no single semester study options; you spend a full academic year at the School.

• You must have completed at least two years of university level study prior to joining LSE (unless studying on the University of London International Programmes).

• If you wish to study qualitative courses (e.g., government, management, law) you should have a GPA of 3.3/4 or above. If you wish to study quantitative subjects (e.g., economics, mathematics, statistics) you should have a GPA of 3.5/4 or above in related subjects. Your grades should put you in the top 10-15 per cent of your class.

• If your two years of university education prior to joining LSE haven’t been undertaken in English, you are required to provide evidence of your proficiency in the English language.

• You choose courses from a list of over 250 but need only take one from the department to which you are assigned (two if in Economics). Your host department need not reflect your major interest.

• Applications can be submitted either on paper or online.

• Applications are considered from January 2013 onwards and will continue to be looked at until all the available places have been filled. The deadline for receipt of applications is 6 September 2013.
• There is no application fee when applying directly to the School.

• All accepted students are eligible to apply for one of four John C Phelan General Course Scholarships, worth £15,000 each.

• University housing is guaranteed to all General Course students.

“The General Course is a window that leads to a world of opportunities”

Patrick Daniel
St. Francis College, NYC
If, after reading this brochure and visiting our website at lse.ac.uk/generalCourse, you have any further questions, or suggestions for ways in which we can improve our literature, please don’t hesitate to contact us via any of the mediums listed below.

Staff from LSE’s Student Recruitment Office make regular visits to overseas institutions and are more than happy to meet with students interested in any aspect of the School. Further details of such visits can be obtained from lse.ac.uk/lseVisitsYou. Advice for those wishing to visit LSE can also be obtained via the contact details below.

On rare occasions, UK universities experience industrial action by staff which may prevent the full range of services, including teaching, being offered to students. The right to take industrial action is permitted by law and the members of staff concerned have legal protection if acting within the law. If services are affected by industrial action or other events beyond the School’s control, the School will use its best endeavours to provide alternative facilities, not necessarily at the time of the action or event. Students should be aware that the School will not issue refunds of fees where industrial action or other events beyond the School’s control affect teaching or other services.
