All you need to know about statistical power on 1/4 page and why you NEED to know it

Presented by Gary H. McClelland, Ph.D., Wednesday—Oct. 28th, 10-11, SGM-718

He will be giving a talk in the GC3 at 10:00 AM on Wed Oct 28th with the objective of helping graduate students to master power analysis for writing grants, dissertation proposals, and journal articles. At noon, he will also be giving a more specialized talk to the full Department in HNB-100.

Dr. McClelland’s visit is at the specific request of clinical faculty and all students are strongly urged to attend his presentations. In the meantime, please direct any questions about these talks to David Schwartz (davschw@usc.edu).

Systems of Care in Children’s Mental Health

Presented by: Marian Williams, Ph.D., Monday—Nov. 2nd, 10-11:30, SGM-460

This presentation considers children's mental health services as they relate to the Affordable Care Act and other insurance parity issues. Included in this presentation will be how Medicaid funding impacts children’s mental health services, and how advocacy efforts such as Mental Health Services Act led to increased access to mental health care as well as expansion of evidence-based practices in children’s mental health.

A Historical and Procedural Introduction to Clinical Hypnosis

Presented by: Gerald Davison, Ph.D., Wednesday—Nov. 11th, 10:30-12:30, HNB-100

This workshop will briefly review the history and nature of hypnosis, relating it to relaxation and mindfulness procedures and discussing it within a Milton Erickson utilization framework. There will be demonstrations of various inductions and an overview of hypnosis as an evidence-based component in a variety of assessment procedures and psychotherapeutic interventions.
