Joint Seminar Series in Biodiversity and Environment

September 20 (USC); Sharon Strauss, UC Davis (host Sergey Nuzhdin)
The inseparable, interacting effects of community complexity and evolution

October 4, 3 p.m. (NHMLAC); Steve Kay, USC (host John Long)
Architecture and comparative genomics of circadian networks

October 18 (USC) Brad Cardinale, U Michigan (host Roberta Marinelli)
Biodiversity loss and its impact on humanity

November 1 (NHMLAC) Mary Schweitzer, NCSU (host Luis Chiappe)
Dinosaurs and diversity: How can fossils contribute?

November 15 (USC) Tony de Tomaso, UCSB (host Andrew Gracey)
Natural transplantation and chimerism in the colonial tunicate, Botryllus schlosseri

November 29 (NHMLAC) Rob Guralnick, UC Boulder (host Dean Pentcheff)
The New Vast Machine: Challenges and solutions to mapping global biodiversity and its change

December 13 (USC) Dave Stahl, U Washington (host Jim Moffett)
The environmental significance of ammonia oxidizing Archaea

The seminars will take place at 3:10 (note special 3:00 time October 4), followed by social in USC – 101 RRI Hall, NHMLAC – Rotunda
Contact the speaker hosts for appointments.
