Course Description

This course provides an introduction to international economics for students of international relations. We address the core puzzle of why poor countries are poor and rich countries are rich, with a focus on international (as opposed to domestic) factors. We cover the economic fundamentals governing the international movement of goods, money, and people, but we also cover the political implications of those flows. We pay attention to the winners and losers created by these flows, and to the policies and institutions that regulate them.

The economic nuts and bolts introduced in this course: comparative advantage, terms of trade, balance of payments, exchange rates, and so forth, are challenging, and the course is demanding. But if you want to save the world, or if you want to get rich, this is the right course to be in.

Readings and Quizzes

The textbook for this course is *International Economics* by Robert Carbaugh (14th Edition). We will also read several articles during the term, all of which will be provided on the course website. (Note: Other editions of this book will suffice substantively, but page numbers in the syllabus are given for 14th edition.)
The required readings are short – usually 10-20 pages per class or 20 minutes of video or audio – but all students are expected to complete the readings before the class for which they are assigned. There will be a short reading quiz at the beginning of every class for which readings are assigned. The quizzes are short and fairly easy – the intention is simply to enforce the assigned reading.

All students have the opportunity to submit notes on the reading to the TA based on the readings for a given class. If you submit notes of reasonable quality on the readings for advance of class, you will automatically receive full credit for the quiz. Notes must be received by your TA before class begins.

Papers
The course requires two very short papers, each limited to 750 words (about 3 double-spaced pages). The papers will cover core political issues in the course: the first is on trade, the second on foreign investment or migration. Despite their short length, my quality expectations for these papers are very high, and we will have a paper-writing workshop before the first paper is due.

Homework
There will be 2-3 homework assignments, which cover the core economic concepts in the course. To learn them, you must work through them. These homework assignments will be partially completed in section.

Exams
For both the midterm and the final, I will distribute a detailed study guide. All questions on the exam will come word-for-word off the study guide. If you know the answers to everything on the study guide, you will ace the exam. No tricks, no surprises. I encourage students to form study groups and collaborate to develop good answers for each question on the study guide.

Grading
Grades for this course will be based on 1). Lecture & section participation (10%), 2). Reading quizzes (10%), 3). Midterm exam (15%), 4). Two Papers (17.5% each), 5). Homework assignments (10%), and 6). Final Exam (20%).

Clickers:
All students in this course are required to purchase a TOPHAP CLICKER Students will use the clickers for two purposes: 1). To take reading quizzes and 2). to answer multiple-choice questions during lecture.

While they are convenient for the reading quizzes, the primary purpose of the clickers is to give students a chance to actively participate in the lecture and to check understanding as we proceed through the material. Clicker responses will be used to calculate participation grades for lecture. With the exception of the reading quizzes, I will not deduct points for wrong answers, but students must attempt to answer the questions to receive participation credit.
Course Webpage
This syllabus and appropriate links are available on the course webpage at http://dornsife.usc.edu/graham. The slides from lecture will be available on the website. Reviewing the slides is not a substitute for attending lecture, and the slides will not include all the information covered in lecture, or all the material that will be on the exams.

Statement for Students with Disabilities
Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to me as early in the semester as possible. DSP is located in STU 301 and is open 8:30 a.m.–5:00 p.m., Tuesday through Friday. The phone number for DSP is (213) 740-0776.

Statement on Academic Integrity
USC seeks to maintain an optimal learning environment. General principles of academic honesty include the concept of respect for the intellectual property of others, the expectation that individual work will be submitted unless otherwise allowed by an instructor, and the obligations both to protect one’s own academic work from misuse by others as well as to avoid using another’s work as one’s own. All students are expected to understand and abide by these principles. Scampus, the Student Guidebook, contains the Student Conduct Code in Section 11.00, while the recommended sanctions are located in Appendix A: http://www.usc.edu/dept/publications/SCAMPUS/gov/. Students will be referred to the Office of Student Judicial Affairs and Community Standards for further review, should there be any suspicion of academic dishonesty. The Review process can be found at: http://www.usc.edu/student-affairs/SJACS/.
