The Francophone Research & Resource Center is pleased to invite you to a new workshop that will introduce teachers of French to “Global Simulation” and its conceptual framework. You will also be able to take part into a global simulation exercise that will provide you with tools, materials, resources, advice on how to initiate a global simulation in your classroom.

Pascal K Douglas has taught French to American college students both at Tufts University as a Teaching Assistant and at the Centre Parisien d’Études Critiques, the study center in Paris affiliated with the CIEE (Council on International Educational Exchange), as well as to an array of International college students at the University of the New Sorbonne, in order to complete his Master’s Degree in French as a Foreign Language (FLE).

Teaching French with Global Simulation

To RSVP, please contact the Francophone Research & Resource Center: frc@usc.edu. For more information, please go to: http://dornsife.usc.edu/francophone-center/. This workshop is organized with the support of the USC Libraries and the Cultural Services of the French Embassy to the United States of America.
