## Please attach the following to this application:

- Brief summary of the research project** (minimum one full page, double-spaced and typed) you plan to complete during the semester. With the guidance of your Faculty Sponsor, describe the purpose of the study, the working theory or hypothesis, the relationship of the project to earlier work in the field and the laboratory techniques.
- Photocopy of the cover page and abstract of at least one research journal article** that you have read to help in the design and execution of the proposed experiments.
- Curriculum vitae required if your sponsor is out-of-department and BISC does not have a current CV on file.** Contact Linda Bazilian to determine whether your out-of-department sponsor's CV is already on file with BISC.

## Research Agreement

I have read the requirements for BISC-290x and have discussed them with my Faculty Sponsor. I am aware that I must conduct the research project appropriately and that I must submit a written research report to my Faculty Sponsor and to Linda Bazilian by the last day of classes. The information entered on this form is accurate to the best of my knowledge.

I agree to sponsor this student's BISC-290x course, to supervise the research with care, and to provide a beneficial learning experience. I will ensure that the student files a research report with Biology by the last day of classes and I will provide a grade to the Department by the last day of exams. I am confident that this student is capable of working independently in my laboratory.
