The 3rd Drug Discovery Innovation Workshop

will be held on
February 28th, 2025
10am – 5pm
MCB, 1st floor

The Workshop is being organized
by **CNT3D, MESH Academy and
Bridge Institute**

The detailed agenda
for the workshop will
be distributed in
January

Please share any
comments or suggestions
for the Workshop program,
including which additional
people/entities you would
like us to invite

We invite Dornsife and all other members of the vibrant drug discovery and development community at USC and across the greater LA area to join us in discussing new experimental and computational technologies and their applications targeting infectious diseases, cancer, pain management, drug abuse, and other important health challenges.

Please save the date, **Friday, Feb 28th, 10am–5pm**
(with lunch served around noon and reception after 4pm).

In addition to USC speakers from Dornsife, Viterbi, Keck, and Mann schools we are inviting leaders in new drug discovery technologies from academia and industry (9–10 talks total).

We also plan to organize a discussion panel centered on sharing ideas on how to strengthen drug discovery collaborations at USC.
