

LABarometer

TOPLINE RESULTS – WAVE 6 – The LABarometer Livability and Affordability Survey

Release Date: December 18, 2025. Field dates: August 28, 2025 – November 14, 2025.

Sample: 1,289 Los Angeles County residents (71% response rate)

Margin of Sampling Error¹: 2.5 percentage points

Full survey codebook and data are at <https://uasdata.usc.edu/survey/UAS+739>. The tables report weighted row percentages (or medians), observations, and response margin of error.

¹ Factors other than sampling error, including question wording, question order, sample type (e.g. opt-in panels vs. probability panels such as UAS), population coverage, and impact of current events, may affect the results of any survey. In addition, the results of questions asked without an interviewer (e.g. in an internet panel) may differ somewhat from similar questions asked by an interviewer over the phone. The margin of sampling error is calculated at the 95% confidence level, using a sample proportion of 0.5 to generate an upper bound of uncertainty. Please note that this is only an approximate measure of error. Precise measures for each individual question or outcome are included in the tables in the “MOSE” column.

Survey introduction:

The goal of this survey is to better understand people's living conditions and experiences in Los Angeles County. Thank you for your participation in this important study about where we live.

1. Life Satisfaction

ls001: Please rate how strongly you agree or disagree with the following statements:

	1 Strongly disagree	2 Disagree	3 Somewhat disagree	4 Neither agree nor disagree	5 Somewhat agree	6 Agree	7 Strongly agree	Obs	MOSE
ls001a: In most ways my life is close to ideal	6.2	9.3	14.1	20.4	25.9	19.7	4.4	1284	+/- 3
