

USC University of
Southern California

CHILD DEVELOPMENT STUDY

The Child Development Study aims to learn more about the effects of after school programs on children's brain development, self-control, and decision-making.

Participation includes a **1 hour-long visit** to USC's Brain and Creativity Institute where your child will complete a couple of computer-based tasks

To participate, your child must be **6-8 years old**

Participants will receive compensation of **\$25/hour** and **transportation can be provided!**

Sign up or contact us to learn more!

This study is funded by the National Institute of Health (NIH) and approved by the University of Southern California Internal Review Board (board of ethics).
