### EAST OAKLAND BHC

#### **BUILDING HEALTHY COMMUNITIES**

#### East Oakland

Health Profile

Understanding the health of your community can start with understanding the numbers. How many children have access to a safe park? How many adults have health insurance? To answer these questions, hundreds of residents in East Oakland participated in the California Health Interview Survey (CHIS). The survey was conducted to support Building Healthy Communities (BHC), a 10-year plan of The California Endowment (TCE) to help 14 communities develop into places where children are healthy, safe, and ready to learn.

This Health Profile describes the health of adults, teens, and children living in East Oakland, one of the 14 BHC sites. It provides a snapshot of key survey findings prior to implementing the BHC plan and can be used to mobilize friends and neighbors, advocate for community change, secure greater resources, and guide community planning. To learn more about BHC, visit: www.calendow.org/healthycommunities/

#### **Selected Highlights**

- Adults in East Oakland are more likely to be obese (32%) than adults in Alameda (13%) and California (21%).
- Parents in East Oakland are less likely to feel that their neighbors get along, can be trusted, or are willing to help each other than their state counterparts.
- Teens in East Oakland are just as likely as teens in the state overall to participate in community service or volunteer work in the last year.
- 13% of children age 0-17 report "fair/poor" health in East Oakland compared to 5% in Alameda County and 7% in California.

Revised February 2012

Demographics*	Oakland %	County %	
Latino	53	24	
White	1	32	
African American	26	9	
Asian	3	31	
Native Hawaiian/Pacific Islander	15	-	
Others**	2	4	
Unemployed	18	6	
Low-income households <sup>1</sup>	51	34	
Limited English proficiency 2	79	49	

- Among adults with children under age 18 and adults age 18-40.
   Others include those who reported American Indian/Alaska Native or two
- or more races.

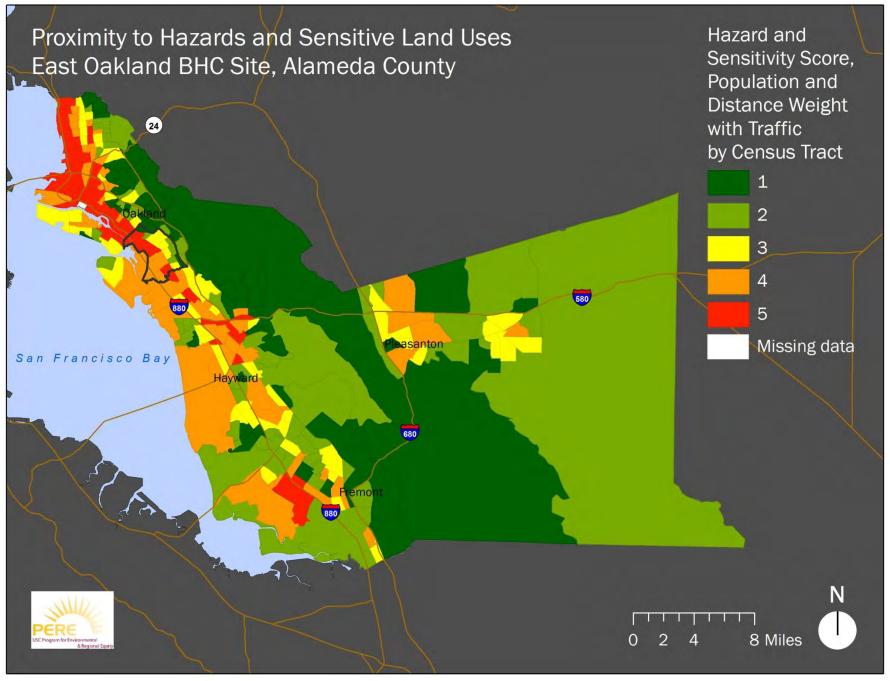

UCLA Center for Health Policy Research | 10960 Wilshire Blvd. | Suite 1550 | Los Angeles, CA 90024 | t: 310.794.0909 | f: 310.794.2686 | healthpolicy@ucla.edu

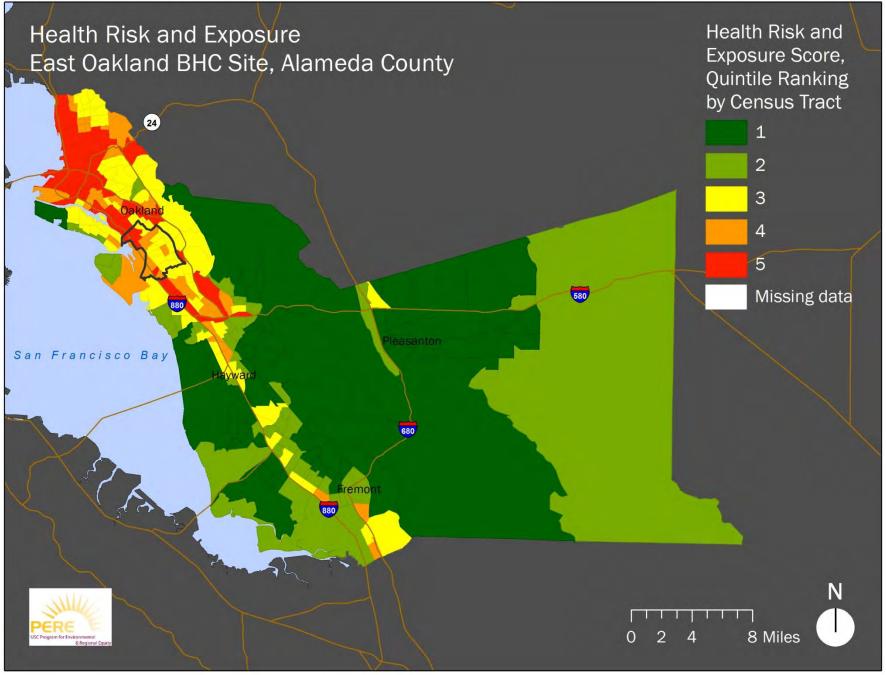

\* Denotes statistically significant difference from BHC site estimate.

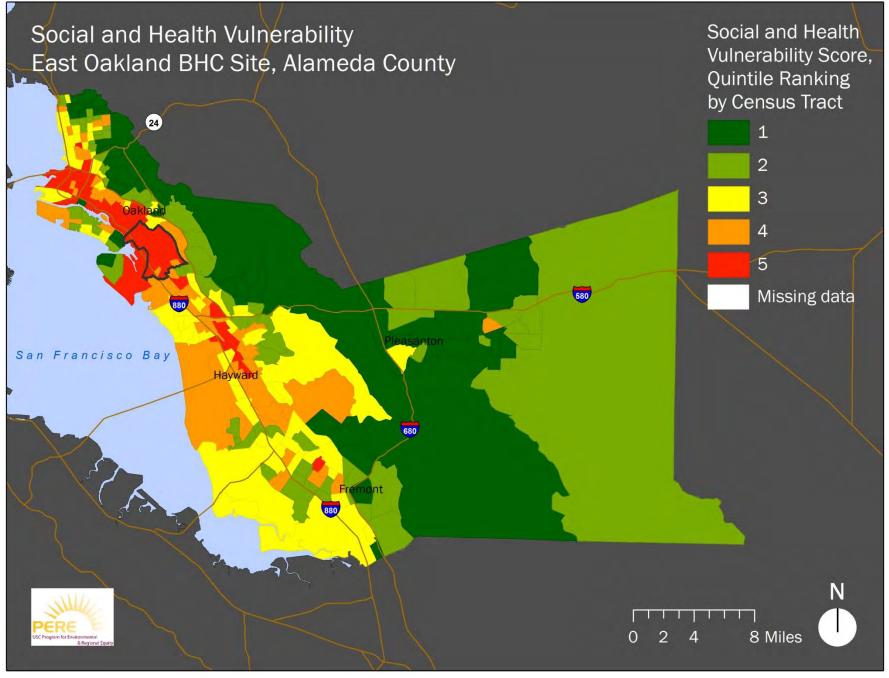

- 21% of adults are uninsured versus 16% in Alameda County & 22% in CA
- by private coverage /
  employer versus 72%\* in
  Alameda County & 61% in
  CA
- 3% of children are uninsured versus 3% in Alameda County & 5% in CA

### EMPLOYMENT GROWTH - ALAMEDA COUNTY

#### Industry Size, Pay, and Growth

(Bubble size represents total employment in 2010)

### LINKING COMMUNITIES

Neighborhood Index: Using 5 indicators subtracting each from their mean of the county they are in and then dividing by the standard deviation.

Help determine the combined effect of social factors that impact health and well-being, including poverty, unemployment, less than high school education, cancer risk, and premature births.
